

ORVYN'S EXOHAND

EMG-DRIVEN ROBOTIC HAND ASSIST SYSTEM

OUR MISSION

To empower people with reduced hand function by translating muscle signals into natural hand movement—restoring independence, dignity, and quality of life.

RESTORED ASSISTANCE

Augment limited and/or daily hand activities.

PRECISE, REAL-TIME RESPONSE

Processes signals instantly for natural assistance.

INTERNET-DRIVEN CONTROL

Uses our smart IoT platform to deliver assistance immediately.

Everyday Tasks

Support activities like eating, drinking, and holding objects.

Stable Rehabilitation

A reliable training tool for support during physical therapy.

Improved Independence

Enhance confidence and self-reliance by providing functional assistance.

WHY IT MATTERS

Restored Independence

Enables users to perform activities in a supporting hand function.

Improved Independence

Helps users perform daily tasks and provides more confidence.

Enhanced Quality of Life

Improves confidence and quality of life, and overall well-being.

Supportive Diagnosis

Supports diagnosis, treatment, and progress and supports a positive attitude.

66 Technology that moves with you.

Recovery that stays with you.
